

Matador have a standard range of rotational moulded bottles ranging from 5 - 25 litres to suit most vehicle applications.

As well as our standard range, bottles can also be manufactured to bespoke design.

A variety of washer jets are available to suit many different wash designs. These may be travelling jets mounted directly onto wiper arms or simply bulkhead mounted jets.

Our 24vdc washer pumps can be supplied as either standard for locally mounted washer bottles or high pressure pumps for those remote bottle installations. Exact specifications can be supplied upon request.
